PROFESSIONAL SUMMARY

Backend developer skilled in **Java 21**, **Spring Boot 3**, and **Spring Security**. Built a **modular monolith financial platform** with **45+ REST APIs**, **JWT authentication**, and **polyglot persistence** (**PostgreSQL**, **MongoDB**). Developed aggregation APIs for **net worth** and **cash runway** and integrated **Google Gemini API** for AI-powered financial insights.

TECHNICAL SKILLS

Languages: Java 21, SQL

Familiar: React, JavaScript

Frameworks: Spring Boot 3, Spring Security 6, Hibernate (JPA)

Databases: PostgreSQL, MongoDB, MySQL

DevOps & Cloud: Docker, Git

Tools: Postman, Swagger/OpenAPI, IntelliJ IDEA

KEY PROJECTS

[Intelli Wealth](#) | [Live Demo](#) | *Java 21, Spring Boot 3, PostgreSQL, MongoDB, Docker, React* July 2025 – Present

- Built a **modular monolith backend** with feature-based modules (**Treasury**, **Wealth**, **Protection**) and **layered architecture** (**API**, **Application**, **Domain**, **Persistence**).
- Designed and implemented **45+ RESTful endpoints** for **transactions**, **budgets**, **goals**, **assets**, **debt**, **insurance**, **net worth**, and **contingency** workflows.
- Implemented **polyglot persistence** using **PostgreSQL** for **transactional and user data**, and **MongoDB** for **flexible financial summaries** and asset records.
- Developed a **contingency analysis API** to compute **monthly burn rate**, **liquid assets**, **financial runway**, and **recommended savings gap** from aggregated data.
- Secured REST services using **Spring Security 6** and **JWT-based stateless authentication**, and built a lightweight **React frontend** for **end-to-end workflows**.
- Integrated the **Google Gemini API** to generate **AI-powered financial insights**, summaries, and personalized debt strategies through a unified reporting system optimized with **Jackson null-field filtering**.

[Learn Quest](#) | *Java, Gemini API, Firebase* Sept 2025

- Built an **AI-driven backend** that parses user-uploaded documents using the **Gemini API** to generate dynamic **flashcards** and **practice tests**.
- Designed and implemented backend APIs and processing workflows to transform unstructured content into structured learning artifacts.
- Developed a structured **Skill Guide chatbot** logic to recommend career roadmaps based on user goals and curated market data.

LEADERSHIP & ACHIEVEMENTS

Team Leader – Smart India Hackathon (SIH) 2025 2025

College-Level Internal Hackathon

- Selected as a **team leader** for Smart India Hackathon 2025, leading a **6-member team** in a college-level internal hackathon.
- Ranked within the **top 45 teams** out of **140+ teams** by submitting and pitching a structured **solution** for an AI-powered EdTech platform.
