Professional Summary

Backend-focused Software Engineering student skilled in **Java 21, Spring Boot, Spring Security, PostgreSQL, MongoDB, Redis**, and **JWT Authentication**. Built a modular finance platform with 50+ RESTful APIs, AI-powered financial insights, and a well structured backend architecture.

Technical Skills

Languages: Java 21, SQL

Frameworks: Spring Boot 3, Spring Security 6, Hibernate (JPA)

Databases: PostgreSQL, MongoDB, MySQL, Redis

DevOps & Cloud: Docker, Git

Tools: Postman, Swagger / OpenAPI, IntelliJ IDEA

Key Projects

Intelli Wealth

Live Demo

Java 21

Spring Boot 3

PostgreSQL

MongoDB

Redis

Docker

React

July 2025 – Present

- Architected and developed a **modular monolith backend** for a personal finance platform with **50+ RESTful APIs** supporting subscriptions, Budget, treasury operations, and debt management.
- Designed and implemented **debt amortization, EMI management**, and **contingency planning** systems for liability tracking, financial forecasting, and runway analysis based on user cash flow and liquid assets.
- Implemented **Redis caching** and **database optimizations**, significantly reducing API response times during development testing.
- Integrated **Google Gemini APIs** to build an AI-powered financial assistant that generates personalized debt repayment plans and context-aware financial recommendations using user financial data.

Zairo

Live Demo

Java 21

Spring Boot 3

Spring Security

PostgreSQL

JWT

Swagger

Feb 2026 – April 2026

- Built a **role-based financial workspace REST API** with 4 granular roles (Viewer, Analyst, Admin, Organizer) enforcing fine-grained access control over read, write, and export operations.
- Designed **15+ endpoints** covering paginated transaction management, date/category/amount filtering, income-vs-expense net position aggregation, and PDF report export.
- Implemented **stateless JWT authentication** with Spring Security; schema auto-provisioned via Hibernate on first run against a serverless **Neon PostgreSQL** database.
- Documented all endpoints via **Swagger / OpenAPI 3**, enabling token-authenticated interactive testing directly from the browser.

Leadership & Achievements

Team Leader — Smart India Hackathon (SIH) 2025

2025

College-Level Internal Hackathon, Terna Engineering College

- Led a **6-member cross-functional team** to architect a fully scoped AI-powered EdTech platform.
- Successfully **qualified for the next phase** out of **140+ competing teams**, notably advancing as a 2nd-year student against upper-level engineering cohorts.

Certifications

🏆 Oracle Certified: OCI Generative AI Professional

🏆 Oracle Certified: OCI AI Vector Search Professional

Education

B.E. in Electronics and Telecommunication

2024 – 2028 (Expected)

Terna Engineering College, Nerul, Mumbai
